ENGINEERED TIMBER FLOORING

Golden Elite's **Engineered Timber Flooring** is a more stable Timber flooring product that has a core which is composed of **multiple layers** of ply wood that are glued together, perpendicular to the grain.

There is a **matte UV finish** on each of the boards, on top of a **3mm or 4mm thick French Oak** timber veneer that is effortless and straightforward to clean.

The **click system** makes installation quick and easy for both tradesmen and DIY projects.

Engineered timber **looks** and **feels** just like solid timber floors, but is more **stable** and **economical** due to it's composition. This helps keep out moisture and **minimise expansion** and **contraction** due to humidity and temperature, which in turn reinforces the durability of the boards.

Engineered timber can be sanded 1-2 times to **eliminate any scratches** and **blemishes** on the surface.

OUR COLOUR RANGE

AMERICAN WALNUT	TASMAN OAK	LIMED OAK	NATURAL OAK	LATTE OAK	SMOULDER OAK	HERRINGBONE VINTAGE
