WOOD PLASTIC COMPOSITE (WPC) VINYL FLOORING

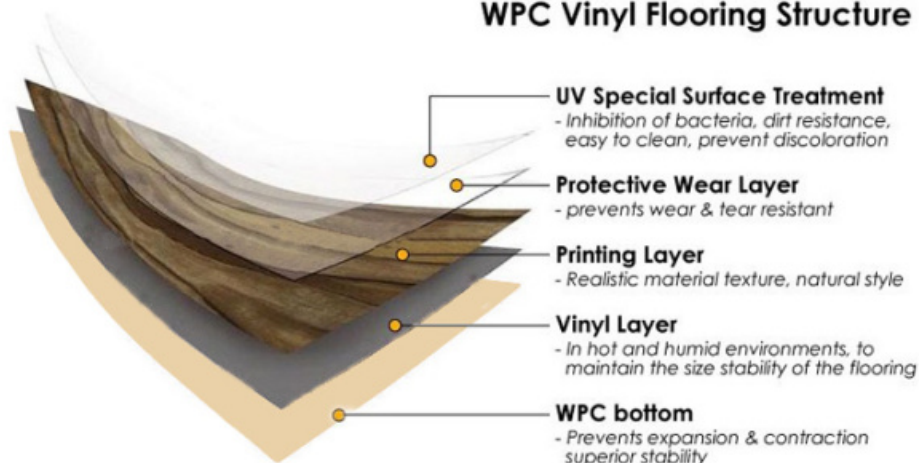

Golden Elite's WPC is a 100% waterproof and bacterial proof vinyl flooring product that uses the Click System which makes them ideal for households. Our vinyl WPC planks are designed to look and feel identical to natural wood planks, complete with embossing to match the original wood grain.

The Wood Plastic Composite (WPC) is a new development, which utilises a component that increases the density of the base board, making it more like a natural floor. The new composition of WPC material prevents the planks from expanding and contracting too much, as well as provide a stronger locking system.

Cleaning the WPC Vinyl is effortless as you will be able to use your conventional mop and vacuum. As it is 100% water resistant, it will not warp or harbor mould, even under the most humid Australian weather.

WPC is also greater value for money due to it being more durable than traditional pure vinyl flooring.
